PIPE APPLICATION

443m of 2600mm diameter Weholite pipe for storm water retention tanks.

Weholite's ease of handling is a major benefit ...

The 12 hectare development embraces a Park & Ride and seven retail outlets. Two separate underground storage tanks were supplied for storm water attenuation in the form of parallel runs of Weholite pipe.

One tank was laid beneath the Park & Ride and adopted by Ipswich Borough Council with the Asset site team extrusion welding the joints internally after the tank had been laid and backfilled by the contractor.

Simons's Project Manager Kevin Lake stated that ease of handling combined with speed of installation proved to be a major benefit to the developer.

THE ESSENTIAL SOLUTION FOR PIPE USERS NATIONWIDE
