PIPE APPLICATION

314m of 1500mm internal diameter
Weholite used for a culvert diversion.

Weholite represented a significant saving on site ...

The burn culverting and diversion was crucial in order for the site development to proceed. In view of the significant savings in cost and time to complete the installation the contractor requested to change from the specified concrete culvert to ASSET Weholite HDPE pipe.

Barr's Project Manager, Roy Kennedy: "*The trench excavation and laying of the 13m pipe lengths was carried out by a 2 man squad and 24 tonne excavator in 8 days (on average laying between 39 to 52 metres per day). Although the pipe costs were similar to concrete the 12 day improvement in the critical path programme represented a significant saving on site*".

THE ESSENTIAL SOLUTION FOR PIPE USERS NATIONWIDE
