PIPE APPLICATION

20m @ 2000mm diameter WEHOLITE H.D.P.E. Class 4kN/m² pipe installed as a storm water attenuation tank

Lightweight Weholite Attenuation Tank for Easy Installation

Difficult road access at the Lewis Homes, Coed Ely housing development necessitated some original thinking by consultants Thomas Morgan Associates. Unable to drive a large enough crane on to the site to lift and place a concrete attenuation tank, an ASSET Weholite lightweight tank was chosen instead. Using a 360° track loader, the 20 metre long, 2 metre diameter Weholite tank was installed and back filled in 2 days.

Tank sections were delivered in 3 lengths and joined in-situ with local contractor DNS completing the ground work within agreed time schedules. "Handling and installation was easy" commented Mark Lewis, director of Lewis Homes. The tank will now be adopted by Welsh Water. A second Weholite tank will be supplied for phase II of the site development.

THE ESSENTIAL SOLUTION FOR PIPE USERS NATIONWIDE
