PIPE APPLICATION

200m @ 2000mm diameter WEHOLITE
H.D.P.E. Class 4kN/m² pipe installed as
a storm water attenuation tank

Considerable Time Saving with Health & Safety Benefits

Halcrow Consultancy specified 200m of 2000mm diameter ASSET WEHOLITE HDPE Class 4kN/m² pipe to provide the storm water attenuation for St George's Barracks housing development by Bryant Homes in Sutton Coldfield.

John Kelly, of contractor M V Kelly, reported that installation of WEHOLITE was completed in seven days representing a saving of four weeks compared to a concrete box culvert solution. Additional savings were achieved because a dry weather channel was not required with the WEHOLITE pipes. Once the pipes were backfilled, the joints were welded by ASSET's on site team leaving a totally sealed tank. It will now be adopted by Severn Trent Water.

THE ESSENTIAL SOLUTION FOR PIPE USERS NATIONWIDE
