PIPE APPLICATION

900m @ 1050mm diameter WEHOLITE  
H.D.P.E. Class 4kN/m<sup>2</sup> pipe installed  
as a new sea outfall

## Success Against Tidal Conditions

A total of 900 metres of ASSET WEHOLITE HDPE pipe was installed for a new outfall at the Cramond Waste Water Improvement Scheme in East Scotland. Contractors, George Leslie Ltd, needed a solution to the problems faced from working under tidal conditions. Easy handling and rapid coupling were required with ASSET WEHOLITE providing the essential solution.

Dave Clouston, Project Manager for George Leslie Ltd, commented "we were very pleased with the production we could obtain using the 14 metre lengths of WEHOLITE. Working in tidal conditions we couldn't afford any problems, and using the WEHOLITE pipe allowed us to maximise what time we had."

## THE ESSENTIAL SOLUTION FOR PIPE USERS NATIONWIDE
